

# HOT-SHOT®

## The Red One® SabreSix®

NEW & IMPROVED  
ENTRY-LEVEL PROD

### Hot-Shot®

In 1939, the Hot-Shot® prod revolutionized the livestock handling industry as the first commercially available electric livestock prod. Hot-Shot® continues to be the world leader offering the largest selection of livestock prods and shafts.

In 2021, we updated two of our most popular Hot-Shot product lines – The Green One® and The Red One® – by modernizing their external designs and adding new performance enhancing features including a stabilizing finger guard and increased water resistance due to a 1-piece molded design. The internal motor and functionality are the same high quality as you have come to expect from Hot-Shot® prods, but with a new look. We are honoring the legacy of the Hot-Shot® brand with the innovation needed to continually improve our product.

### Why do people use prods on cattle and livestock?

- Safe, effective and proven redirection of livestock
- Reduces stress and unnecessary injury to animal
- No harming or bruising of meat

### Livestock prods are considered safe to use for the movement of adult livestock

- ✓ There is very little amperage (electrical heat) in a Hot-Shot® prod but it is still effective on a 2,000 pound bull
- ✓ Designed for use on CATTLE AND HOGS ONLY, to aid in the movement and handling through gates and chutes
- ✓ Should not be used on other animals such as horses, dogs, sheep, or goats

### The large selection of Hot-Shot® prods all share many technological advances, including:

- Well balanced, easy to hold and operate
- Interchangeable shafts
- Safety clip or switch to prevent accidental operation
- Rechargeable battery pack options including wall, vehicle, and USB chargers
- The power to move livestock safer and easier

### Commitment to Quality - Made in the USA

- All units and components are 100% inspected for output using sophisticated electronic testing equipment
- Destructive testing is run on all prods to ensure they continue to our high performance requirements long after customers purchase them

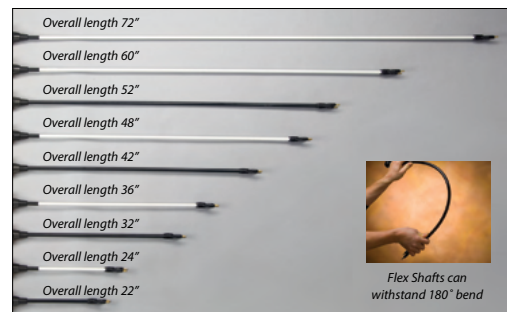

For more information scan this QR code with your smart phone

- Modernized external design with added finger guard to prevent slipping
- Fully sealed solid state motor module with increased water resistance
- Entry-level prod at an economical price
- Medium spark is most effective on clean, dry animals
- No tools required; Easy to disassemble and clean
- All components easily replaced by user
- Available as a complete unit or to create prods shorter than 32" or longer than 48". The handle and shaft can be ordered separately
- Complete units include 6 C-cell batteries or rechargeable battery model #RBP3

### Shafts

Hot-Shot® is the only brand of prods to offer two styles of shafts. Choose from the traditional rigid fiberglass (RH) or the durable flexible shaft (FX).

	FLEX (FX)	RIGID (RH)- 60% OF SHAFT SALES
<b>LENGTH OPTIONS:</b>	22", 32", 42" & 52"	24", 36", 48", 60" & 72"
<b>MADE OF:</b>	Polycarbonate	Durable fiberglass
<b>BENEFITS:</b>	<ul style="list-style-type: none"> <li>• Flexible shaft can withstand bending up to 180 degrees</li> </ul>	<ul style="list-style-type: none"> <li>• Most durable shaft on the market</li> <li>• Added safety and maneuverability</li> <li>• Only offered by Hot-Shot®</li> </ul>
<b>GREAT FOR:</b>	<ul style="list-style-type: none"> <li>• Tight spaces</li> <li>• Truckers</li> <li>• Smaller herds</li> </ul>	<ul style="list-style-type: none"> <li>• Feedlots</li> <li>• Commercial haulers</li> <li>• Larger herds</li> </ul>

Lengths shown above are when attached to prod and include length of prod handle

### Batteries

**Alkaline:** The high alkaline C-cell batteries are long lasting batteries ideal for use in Hot-Shot® Prods. After hundreds of hours of engineering testing, we have proudly partnered with Rayovac®, a leading battery brand for over 100 years, to ensure the batteries used to power our Made-in-USA livestock prods continue to be American-made.

**Rechargeable:** Rechargeable nickel cadmium packs the life of hundreds of alkaline batteries. Closes securely with flip top. LED light lets you know its charging. Charges from either a 110-volt wall outlet or a 12-volt automotive battery with proper adapter. Works with Hot-Shot® 110V Charger Adapter (R110), 12V Charger Adapter (R12), and USB Adapter (RUSBHSUS) all sold separately.

**GOOD**

# The Red One®

SabreSix®

- Entry-level prod at an economical price
- Medium spark is most effective on clean, dry animals
- Modernized external design with added finger guard to prevent slipping
- Fully sealed solid state motor module certified to IP45 solid and water ingress standards
- No tools required; Easy to disassemble and clean
- All components easily replaced by user

**Lowest voltage prod for small herds**

**BETTER**

# The Green One®

HS 2000®

- Proven and preferred by commercial livestock haulers
- High output energy (strong spark) is effective on both clean, dry animals and those that are wet or have heavy hair or debris on them
- Modernized external design with added finger guard to prevent slipping
- Fully sealed solid state motor module certified to IP45 solid and water ingress standards
- No tools required; Easy to disassemble and clean
- All components easily replaced by user
- Good battery efficiency

**Higher voltage than THE RED ONE® and meant for larger/commercial herds**

**BEST**

# HOT-SHOT®

## DURAPROD®

- Superior ergonomic design features oversized trigger, rubber grip and hand guard
- Sealed circuitry and patented design technology to reduce feedback shock
- Operates on only 4 "C" Alkaline batteries (instead of 6 like The Red/Green One®)
- Quick change battery packs – no tools required; rechargeable packs drop into charging station for convenience
- High output energy (strong spark) is effective on both clean, dry animals and those that are wet or have heavy hair or debris on them
- Fully sealed solid state motor

**HOT-SHOT®**  
**DURAPROD®** LIMITED DURATION

Same as the DuraProd® but...

- Delivers one-second of output with each press of the switch
- Great choice for those concerned about humane treatment of livestock

**Same voltage as THE GREEN ONE® with ergonomic handle for increased comfort**

**PORTABLE**

## POWER-MITE®

- Portable, light and compact
- Fits easily into a pocket
- Moisture-resistant on/off feedback shock
- Includes two 9-volt Alkaline batteries
